

KNOCK, KNOCK TEACHER

by:

Dorothy D. Pingol

Teacher I, Capitangan Elementary School

Being in the classroom is like watching a movie. Sometimes, it's like comedy, action, drama, and suspense. It is challenging to deal with different learners. They are extraordinary in a distinct way but with the same need. They indeed are not our authentic children. Yet, they are love truly in our hearts and mind. Their needs are being ready even they did not ask. They are like stars waiting for their time to shine.

When dark days come, it is the time to hold a hand. The strength that will push us to go forward. Hit the finish line and continue to fight for the love of our learners. Even the pandemic will not stop us. We will continue to serve the thirst of the young minds. We aim to light the path of every child who seeks progress step by step. As they enter another chapter of their studies, we will be guiding them all the way.

As a teacher, we are not just making a future scientist, a nurse, a lawyer, or an educator. We are making PEOPLE that will build a better world. We are making a PERSON who stands for truth and justice. We are making a door that will open opportunities to all. No gender, color, or races require. We are making doors that will open rooms for improvement. So as school opens, we know that there are changes that will come along the way. We will create many doors open that will change the face of the world. Doors that will not refuse someone who wants to learn and will make a difference. Doors that will unite genders as fair and equal. No walls. No discrimination. Only welcoming chances and hopes.
