

MY VISION OF “THE FUTURE YOU”

By:

Melanie D. Francisco

Teacher III, Limay Elementary School

Passion for teaching inspires and motivates the learners to learn more for the future. It is also the commitment and dedication of the teachers to learners and their learning.

My enablers of passion for teaching as an educator branch out into three parts and played an important role in my life. First, my Family. My Family is one of the important things in my life, my strength and happiness. I feel very blessed every time I see them happy. They are also my strength to fight in life. Since I was a child, I learn from my parents the love and respect for each other. Now, that I have my own family I want also to teach them the good values that I learn from my parents. And, as a teacher, I want to be a good role model to my learners, because I treated them as my children.

The second is Teaching. During my elementary grades, I am very happy every time I assign as a leader in our group, discussing in front of the class and having a group activity with my classmates. I also imitated my teachers before; I love how they teach us to learn. These are the reasons why I am a teacher now. I want to also others to learn and it challenges me to teach others. Now that I am a teacher, my passion for teaching is to motivate my pupils to learn. Learners nowadays are different, unlike before. They are now exposed to new technologies, that sometimes affect their studies. They a lot most of their time using tablets and computers and sometimes they are not properly guided at home. Every day, I have an excess time I used to teach learners who have difficulty in some learning areas, like reading and math skills. Teaching is not easy because learners have their own unique way to learn. As a teacher, we have always the patience to teach, especially to those learners who need us.

The third is Recognition. Becoming recognized as a good teacher is also my passion as a teacher. A simple way to recognize me is a blessing. The fruits of my hard work. My latest recognition this year, was when I was recognized in first place in our District in Limay as a Brigada Coordinator and 3rd place in the Division Level for the Best Implementer of Brigada Eskwela. I different also have winnings as a coach in some District and Division contests like in Press Conference and MTAP - Math Challenge. These recognitions inspired me to help others, especially my coworkers so that they are also motivated to explore more and bring out their hidden talents and skills. These recognitions also motivated me to become a better person in our community.

As an educator, I try to learn something new that will help me as a good or a better teacher. To go on with the flow of our society, especially in the field of education, I attended different seminars, and online courses and try to become a module writer, layout artist, and illustrator of modules that will help our students. We need to learn, to teach students new knowledge and skills, if we have all of these, we can teach them what we have. Like what we always said, we can give what we have, but we cannot give then if we don't have.

Different personalities, but we have the same vision. As an Educator, My Vision is to create students better than us.
