

EDUCATIONAL GAMES

by:

Maria Aiza A. Dela Cruz

Teacher III, Alikabok Elementary School

Schooling is made more fun and zestful through educational games but there are more important reasons why a teacher should apply them in teaching the learners.

Let us unravel the benefits of educational games to our learners and in their acquisition of knowledge and skills in school.

It motivates the learners. Through the utilization of educational games in the classroom the interests of the pupils to learn are being stimulated. Since the young people are amazed with enjoyment, having games during class interaction is indeed motivating.

It captures the attention of students. Whenever the teacher introduces educational games the student's attention is caught. Games are truly catchy because the learners cease their boredom and tend to focus on the lesson.

It leads one to solve problems pleasantly. Solving problems particularly in math would be easy and zestful whenever the teacher presented it through an educational game. With it, the learner is able to cooperate willingly and will be able to solve things easily.

It also helps in language development. The learners will be exposed to more interactions. Whenever they interact in an educational game, they tend to speak more words and their language development may occur.

It increases the learner's self-confidence. With the aid of educational games, the self-esteem of every learner is developed and even enhanced. Through educational games the learners would feel that they belong in the group and that they are important.

It promotes students' participations. Educational games are certainly attractive to learners that is why their participations are being so evident because they really show their eagerness to cooperate in various activities.

It enhances the child's memory. The child could easily absorb and acquire knowledge and skills through educational games. Thus, the child's memory is heightened.

It augments social-emotional learning. Educational games give the learners more chances to interact and socialize with others. Moreover, they tend to express and learn to regulate their emotions or feelings in their association with others.

Educational games are indeed useful in improving the child's abilities and well-being.
