

FUN WAYS TO TEACH

by:

Evangeline L. Isidro

Teacher I, Pantalan Luma Elementary School

The teaching-learning process is a crucial and important part in our lives. Usually, it is done with the traditional way of instruction. Instructors teach through the paper and pencil method and also through using computers and other modern technology.

For young learners, however, there are more fun ways to teach so that they may learn well. These type of learning can be fun, enjoyable and memorable for them. These may motivate them to continue learning and remove their fears on the lessons.

Here are some ways:

Arts and Crafts.

Some young learners are good in arts and crafts. They learn and perform better with the use of designs and aesthetics. They go well with lines, shapes, colors, textures, design, etc. Arts and crafts can be integrated with different learning areas like language and literature. This can be and creative for them.

Music.

Though Music is already a part of MAPEH (Music Arts, Physical Education and Health), this can also be used in teaching different subjects. Instructional videos become more fun and enjoyable by including music and rhythms with them. Studies have shown that learners remember and recall better when there is a music included with it.

Storytelling.

Learners, especially young ones, love stories. They learn from reading and listening to stories. Moreover, if they can relate to stories, they can remember the lessons better. With this, storytelling is integrated with some parts of the lessons. Through this, learners can be discovered as active learners. Even more, they, themselves, can be effective storytellers in the future.

Number games

Games in teaching Math is fun and enjoyable. For elementary, the use of flashcard games when teaching 4 Fs (Addition, Subtraction, Multiplication, Division) is proven to be fun and engaging. Educational Bingo can be used in Science and other subjects of Junior and Senior High School. These number games enhances memory and creativity as well so it is cool to learn.

Simulation, Role Playing, Acting

Some learners enjoy learning when they feel like they are part of the lessons and of the story. By using storytelling, we can develop the Thespian skills of our learners. They also remember the lessons, because they are involved more.

There are different ways to teach and learn. These are some ways to teach to children. Let us make the teaching-process more enjoyable.
