

“#PATHWAY TO A BETTER DAY”

by:

Evelyn D. Monta

Teacher III, Orani National High School - Main

Apparently, the planet where we live requires everyone to be competitive in order to survive, particularly in the world of professionals. High standards were set and not everyone qualifies. There are some that requires skills, and some requires knowledge, while others requires both. And it is one's advantage for having these both.

We cannot deny the fact that having a degree gives someone a huge advantage especially in the workplace.

Unfortunately, there are some who takes education for granted, not realizing the importance of it. Through education less fortunate individuals can have the opportunity to change their lives. Just like what Malcolm X said, education is our passport to the future, for tomorrow belongs to those who prepare for it today. We need to study today in order to equip ourselves with the knowledge and skills that we will be needing to pursue our dreams. We have to prepare ourselves today for us to be capable for tomorrow.

More so, education does not only gives us knowledge and skills, but it also hones us to be the person we need to be to achieve the goals we set, and the life we desire to have.

Moreover, education makes you wiser which can lead to better decision making in life, which will result to lesser challenges that we might be facing in the future.

Truly, education plays a very important role towards achieving one's aspirations in life. It serves as the guiding light towards a better life.
