

PRINTED MODULE TO DIGITIZED: SUCCESS BENEATH SUFFER

by:

Rodrigo G. Manuel

Teacher II, Luakan National High School (SHS)

Sucffer: Success beneath suffer

Beyond the agony and temptation of students wanting to escape from the present obstacles towards the rope of simple wish. Will to grant by teachers whom they lead and live as a parent. Even in darkest times blood, sweat and tears falling from teachers to guide but accept the changes within this pandemic for the sake of the poor innovation but quick learning allegations.

Lucky those but not reading the importance was a mistake and waiting for them to realize, a cheater cannot be a repeater but they're the once putting themselves into painful future.

Education is not a trial card from game Mobile Legends where you can use it lightly but not for lifetime happiness that you can forget and spend time for a couple of hours. A student from grade 12 in Accountancy and Business Management, said " Personally, this new normal way of education helped me to be independent. However, not all of us are fond of this new normal way of education. There are struggling because of their environment at home. We are not the same. We are sailing the same sea with different boats. There are advantages and disadvantages in this new normal way of education. For instance, you have a lot of time to do your modules. And for the disadvantages, you just cannot process all the information alone because we got to admit it, we need guide, we need our teachers. My opinion to this matter is that it is good to some individuals, but it is a nightmare to some people. In my experience there are bad

and good but then again it made me an independent person as I am able to stand up alone and learn all the lesson."

From the choice hidden inside of the paradise to claim how you can commit for prioritizing your goals is the best treasure. Legally it is the boundaries of where you suffer or to pursue and pull the rope to reach the high value of success.

Digital learning provides students and learners with unbeatable flexibility and the ability to organize their time in accordance with the other aspects of their lives that are important to them. Digitized is quickly becoming a very popular style of education in virtually every region of the world due to COVID-19 pandemic. The blend of education and technology has made it available for all students. It is a method that is more engrossing and smoother for learners to grasp.
