

PROVIDING BASIC EDUCATION REGARDLESS OF THE CHALLENGES

by:

Christian A. Cruz

Teacher III, Lucanin Elementary School

The Effect of COVID -19 created a history in the Educational System in the country. Knowing that there were millions of learners were affected. Covid -19 pandemic, both educators and learners are pinning their hopes on a new normal type of education involving online and modular learning. Sadly, educators are seemingly on the walk blindfolded on what to expect once the new school year virtually opens.

Amidst the uncertainty of continuing education without boundaries, Learning Continuity Plan (LCP) was assured by the Education Department. LCP will serve as the guiding principle of the K-12 education system. A plan seeks to make certain that school children's learning progresses even amid disasters, such as natural calamities, storms, fires, and pandemics.

This scheme overwhelms impediments produced by the misfortunes through innovative means of teaching and learning, keeping students on track with their courses. The didactic context is unruffled of different significant columns such as School Preparedness, Human Resources, Infrastructure Readiness, Transition program, Building Partnership, Teaching, and Learning Modalities, and Assessment centered on the Growth of the Utmost Essential Skills and Morals of the Pupils.

In the LCP, the choice and contextualization of the learning modality of schools will depend on the local Covid-19 situation as well as access to certain learning platforms. Despite the guidelines set by the national level, still primarily consider local public health conditions in adjusting our LCP.

Preventive measures will be put in place to secure the health and well-being of our personnel and our learner under this new normal.

Online Instructions, Print, and modular Instruction, Radio and Television based instruction, and other means were devised to continuously provide much-needed help to learners and teachers. These learning modalities progressively adapt to the needs and capacities of each student. Despite the various learning progressions, education field units will determine the most appropriate combinations or strategies for every locality as we look into addressing the equity concerns of our constituents in this new arrangement.
