

## “SIMPLY A TEACHER”

by:

**Evelyn D. Monta**

*Teacher III, Orani National High School - Main*

Hey! You....Do you know someone who always asks, "What is your profession?" What course are you going to take in college? Some others say, take the education course..it suits your mental ability. Teaching is so easy!

Why does teaching seems easy for some people? Why do they need to compare it with other professions? When in fact, without teachers, we cannot have these professionals. Right? Teaching is not just an interaction between a student and a teacher in the four corners of a classroom. It takes a special person to teach a child in class. To motivate and inspire a child to be the best that he/she can be. In every lesson, they light the path that leads our youth to brighten their future. To be emotionally strong to accept criticisms and to be a role model to everyone and to dedicate his/her life for the love of teaching.

According to Aman Kumar, Teaching is a profession and at the same time a vocation which require skills, passion and most of all patience. It is a pathway to build developments in somebody's life by granting proper guidance, enough knowledge and ideas and interacting with others.

You need to stand with pride in front of the class with enough knowledge to share with the learners which serve as guide and weapon in their life's journey .It also involves leadership skills as you need to discipline the class. It is important to show more leadership ability and try to capture student's interest and focus in the lessons being taught. Because it lies on your hands to shape the learner's mind to prosper more considering you as their second mother.

Is it right to say just a teacher or simply a teacher?
