

USING CREATIVITY IN THE CLASSROOM

by:

Alvin M. Santiago

Teacher III, Antonio G. Llamas Elementary School

Pandemic demonstrates that learning can go on in spite of vulnerabilities that we encounter even up to this day. Showing changes utilizing various innovations, multimedia and applications. Educators demonstrate that we can adapt to the various patterns, changes and provoks to instruct and use our imagination in present day manner utilizing advancements accessible to educate for our students.

Imagination in sight and sound, utilizing different current procedures, application and methodologies that can elevate and spur our students. It assumes a significant part of this time specifically in education. Learning and teaching creatively even in our four corners of our home and classroom utilizing different mixed media methods or instruments makes our teaching more tomfoolery in the present day. Imaginative teaching is basic in the present way of teaching (Lamar, 2017). Thus, teachers ought to adjust to and oblige these essential changes. The job of a decent educator is to add imagination in the classroom and draw out the best. The right blend of imagination alongside educational planning assists with being inventive and furthermore urges our students to learn new things and motivates them to learn. Imaginative teaching in the classroom can truly change the manner in which learners apply it in reality. The significance of innovativeness and creativity contributes a great deal to improved and assists students with having proceeds with scholastic development as well as imagination (Edys, 2017). A creative teacher in the classroom also gives a significant and powerful growth opportunity for the learners to develop and learn.
