Regional Director

Dear Dr. Eclar,

RECORDS SECTION, REGIONAL OFFICE NO. 1

Advisory

No. _____, s. 2022

141

To: All Schools Division Superintendents

For information

MAY B. ECLAR, PhD, CESO III
Regional Director

UP Circuit is an academic, non-profit, and non-political organization based in the Electrical and Electronics Engineering Institute (EEEI) of the University of the Philippines – Diliman. The organization aims to promote academic excellence in the field of Computer, Electrical, and Electronics and Communications Engineering that will encourage holistic development of its members through various activities within and outside the university.

With the tradition of promoting academic excellence, UP Circuit has been bringing together the country's top young minds in the field of Electrical and Electronics Engineering in a battle of wits and brilliance. **SquEEEze**, our flagship event, is the **only national intercollegiate Electrical and Electronics Engineering quiz show in the Philippines**. Now in its **25th** year, in spite of the challenges faced due to the pandemic, SquEEEze continues to bring a set of events that will engage more excitement and challenge for a wider audience. SquEEEze provides an exhilarating and holistic learning opportunity not only for college students, but also for high school students from the different regions across the country who are willing to compete and test their intellect against other schools. Along with the annual intercollegiate quiz show, workshops will also be conducted. These workshops aim to familiarize participating high school students with the basic applications of Electrical and Electronics Engineering, thus making them appreciate the field even more.

This year's installment will again include a Technological Design Contest wherein students from across the country will be presenting their innovative ideas that provide solutions to the problems of our environment, community and country, which are especially important during the time of a pandemic. This day will also include an EEE Convention that includes a series of talks and seminars given by notable speakers in the field of Electrical and Electronics Engineering.

The pandemic has limited most physical interactions in the past years. And as such, SquEEEze has shifted into a virtual set-up. With the success of last year's event, SquEEEze: The National EEE Competition and Convention will continue to be administered virtually and will be held on **November 26** and **December 3**.

In line with this, we would like to cordially ask for an endorsement from your office. This endorsement would greatly encourage students from different schools in participating in this campaign of academic excellence that our organization aims to impart. With the endorsement of the Department of Education - Region III, we are hoping for a greater chance in extending this campaign to the bright minds of many young students.

We are looking forward to hearing a positive response from your office. For questions and concerns, please contact the undersigned event's heads or the head of competition, **Nico Concepcion (09161464453)**. A copy of the competition handbook is also attached where you may find all the detailed mechanics for your reference.
