October 28, 2022 – The Department of Education (DepEd) intends to maximize learning recovery by bringing students back to school while also implementing appropriate measures. DepEd would like to express their sincere gratitude to all of their local Government Units (LGUs), National Government Partners, Non – government Organizations (NGOs) and stakeholders for respecting and supporting DepEd’s position against the unnecessary cancellation of classes and the use of our schools as accommodating sites for events that are unrelated to the curriculum.

DepEd or the Department of Education is one of the departments of the Philippine government which has the responsibility of governing and taking care of education matters so that all students and teachers will truly see the real definition of education, which magnifies classrooms and students’ performance.

Based on this issue, we could tell that not only public schools, elementary to secondary level, should hear the DepEd’s stand and voice “Cancellation of Classes and the Use of schools as Billeting Areas” addressed to LGUs, NGOs and other government agencies and other stakeholders who wish to use the school that might cause the delivery of learning be delayed and hamper the chance to address learning gaps due to cancellation of classes. It is also stated that classroom assessment is an integral part of curriculum implementation because it tracks and measures learners’ progress and adjusts instruction accordingly. Moreover, classroom assessment helps inform the learners, their parents, and their guardians about their progress in school/ class.

Employees, teachers, heads, and all others concerned your support affords uninterrupted class sessions for our learners, and helps our teachers avoid unnecessary make- up classes, which pose as an additional burden to their teaching load.

By understanding the main purpose of this article, DepEd is willing to give the best way on students for them to cope with their average learning amidst various challenges. DepEd also remains steadfast in this pursuit of providing accessible and quality basic education for all. We, however, cannot do this alone. Therefore, we enjoin everyone to help our learners recover from these losses.
