

## BRING IT ON

by:

**Arnold Dollente**

*Teacher II, Mariveles National High School – Batangas II*

What seems to be deliberately good with the current situation is that people are always excited to meet their peers and their friends. It is a feeling that enhances everyone. In the school, the backpacks, books, bookshelf as well as the printing machines, are all alive. Thanks to the vaccines and the efforts of the government, the health staff, and the educators who are very much willing to do everything to assist every Filipino people, especially the students are able to hold on to life with whatever it takes. This is a real scenario where another resolved conclusion is made. Filipino people are strong and they are not that easily broken into pieces. They are like hard-core titanium that can survive amidst all the complications of life. Moving on is their way. Bring it on! Some may say, we have been through the worst days of our lives, what could be far worse than this? It is a grateful feeling of happiness and love, passion and perseverance. What is important now is the feeling of perseverance that the current generation of students and educators teach towards the next generation of learners. The patience and perseverance everyone witnessed before, during, and after the transmissions of COVID 19. So, with the confidence everyone is getting, as every Juan and Juana says “Bring it on,” what might await everyone in the upcoming sessions of learning?

With this on mind, please consider the following:

- Adjustments take time. Give time for the students especially the pupils who came from online learning, as teachers give more patience and understanding that everything and everyone needs time to heal and adjust as well as move on from one educational platform to another.

- When dealing with face-to-face, remember to blend in the online tools one might learn since this may enhance the role of teachers and the interaction of students.
- Give time for the students and pupils to socially adjust and try not to confiscate their gadgets since it was and will always be their way of communication, try to meddle with things in time and proper approach as well as appreciation.
