

BEYOND KNOWLEDGE AND SKILLS

by:

Jermie A. Alicante

Master Teacher I, Justice Emilio Angeles Gancayco Memorial High School

A great teacher is someone who has the ability to inspire and engage their students, while also effectively conveying knowledge and skills. There are several qualities that are essential for a great teacher, and these qualities are necessary for creating a positive and productive learning environment.

One of the most important qualities of a great teacher is the ability to connect with their students. A teacher who is able to establish a positive relationship with their students will be able to better understand their needs and create a learning environment that is tailored to the individual needs of each student. Creating a welcoming and encouraging atmosphere for students, as well as being understanding and approachable, are essential for fostering a positive and supportive environment for learning.

Another important quality of a great teacher is the ability to convey knowledge and skills. A great teacher is able to present information in a way that is easy to understand and retain. They are able to use a variety of teaching methods, such as lectures, discussions, and hands-on activities, to make learning engaging and interactive. Additionally, a great teacher is able to assess student learning and adjust their instruction accordingly.

Furthermore, a great teacher is a lifelong partner. They are constantly seeking to improve their own knowledge and skills, and are open to new teaching methods and technologies. They are also able to stay current with changes in their subject area and can incorporate new information and research into instruction.

Most importantly, great teachers can inspire and motivate their students. They can create an environment where students are excited about learning and motivated to succeed. They are able to set high expectations for their students and are able to provide the support and guidance necessary for students to reach their full potential.
