

## TEACHING STRATEGIES FOR THE NEW GENERATION

by:

**Marly G. Montalbo**

*Teacher I, Mariveles National High School - Poblacion*

There are a variety of teaching strategies that can be effective for Generation X, Y, and Z students. Here are some strategies to consider:

Use technology in the classroom: Generation X, Y, and Z students are all highly familiar with technology, according to Robert Capa, so incorporating it into your teaching can be a great way to engage them. Consider using online resources, such as videos and interactive tools, to supplement your lessons.

Encourage collaboration: Many students from these generations thrive in collaborative learning environments. Consider incorporating group work and peer-to-peer learning into your lessons.

Provide opportunities for hands-on learning: Generation X, Y, and Z students often learn best through hands-on activities. Incorporate activities and projects that allow students to apply what they've learned in real-world contexts.

Offer choice and autonomy: Generation X, Y, and Z students value autonomy and self-direction. Provide opportunities for students to make choices about their learning and give them ownership over their education.

Be adaptable: Be willing to adjust your teaching strategies as needed to meet the needs of the students in your class. Be open to feedback from your students and be willing to try new approaches if something isn't working.

Provide real-world examples and connections: These generations are more interested in learning something that has practical application in the real world. Incorporate examples and connections to the real-world to make the subject more relatable and interesting.

Use of gamification elements: Gamification can be a good way to make learning fun and engaging. Consider using elements like rewards and points to motivate students and make learning more interactive.

Provide constructive feedback: Provide regular and timely feedback to students on their progress and performance, and make sure that the feedback is actionable and specific.

Use of digital tools and platforms: These generations are digital natives and are comfortable with technology according to the two authors David Buckingham and Rebekah Willett a book, "Digital Generations". Use of digital tools and platforms can enable students to learn in a more interactive way and enable communication and collaboration with other students and teachers.

Embrace diversity: Embrace diversity among your students and use it as an opportunity to learn more about different cultures and perspectives.

It's important to remember that different teaching strategies will work better for different students, so it's important to be adaptable and willing to try different approaches.
