

## BENEFITS OF POSITIVE BEHAVIOR IN ACCOUNTANCY

*by:*  
**Edna D. Tolentino**

Everything in life must be balanced and well organized, like accounting. An accountant is a good choice for someone with an analytical mindset who enjoys working with the financial data. And we cannot ignore the fact that work of an accountant can be complicated. Accounting and bookkeeping are one of the assets in any organization. They measure and check the financial status of the organization and provide invaluable data for business decisions. For that matter, these fields demand top-notch accuracy and excellent organizational skills. In every finance department, the accounting works are evident and hard.

Pressure is evident when it comes to choosing a career that will provide you a better future. This form of mindset can lead to stress and impact on overall mental health and needs consideration. As an accountant, complications are in line with their career. Professional accountants are regularly confronted with ethical choices and moral dilemmas in the course of their professional activities. Their good and admirable character are seen towards their inviting behavior to others. As an effect, everyone in the firm will be influenced by this.

Additionally, the accounting staff will also imbibe such an attitude in their work which can be beneficial to everyone. For that matter, working in a positive environment will ripple like waves and spread throughout the company and it creates harmonious relationship towards others.

In conclusion, the effect it positive behavior in accountant will create a pay-it-forward attitude, and the work will be lightened and more efficient. It will be inviting and

motivating for every department to work effectively and productively. Everyone in the company will exhibit pleasing attitude and behavior that the most complicated work in the building can generate noteworthy work-results in a positive way. Everyone will follow the same rules, then harmony prevails and no conflicts will exist.
