

GIFTS OF KNOWLEDGE

by:

Sonny D. Villanueva

Teacher II, Mabatang National High School

Knowledge is a special gift from God. It is also one of the primary sources of learning. This is indispensable and important in man's survival and development. In school, the teachers instill the value of knowledge among learners and consider it as vital in the discovery of things.

First, knowledge gives us information that we owe to know. With knowledge, we are gifted with the data and things that are involved and related in our existence. Knowledge makes us aware of the thing/s that we need to learn for our own benefits.

Second, knowledge endows us with the ways of doing things. Knowledge gives us the procedure, practices, strategies, and techniques on how we are going to do things. In other words, we are learning the necessary habits of demonstrating things for good causes.

Third, knowledge provides us with inspiring stories of significant people. This leads us in knowing their bright deeds and accomplishments that made them known, brilliant and successful. With knowledge, we learn to see how notable people sacrificed and risked their lives for the sake of others.

Fourth, knowledge takes us to a journey. We can visit different places and appreciate different cultures through the knowledge contained in books, in movies, in documentaries and even in artifacts. It seems that we are travelling the moment that we read things about the places and their people.

Fifth, knowledge helps us to relate with people. With knowledge we can trace the characteristics or qualities of different kinds of people from all walks of life. Through having knowledge on them that we learn to understand them and tolerate their strengths and weaknesses.

Sixth, another gift of knowledge is that we perceive the meaning of life. We can discover the actions of people that are indeed heroic. These people are somewhat heroes in their own rights for they can serve others in the best ways they can as part of humanitarian reasons.

Seventh, knowledge may let us enjoy life. Happy stories and events are learned through reading knowledge. With this, we can realize that life is filled with happiness and that we should savor every moment in life.

The gifts of knowledge are somewhat great and people particularly the learners should recognize and appreciate them!
