

TRES: PLANNING, PREPARATION, SCHOOL

by:

Hyacinth Shane V. Samaniego

Teacher III in Mandama Elementary School

Uno, everything will start if someone dares to start it even slowly. Dos, others will follow since the trust was created by the initiator. Tres, one and two yielded good results; thus, continue what we have started.

The warm breeze felt on my thin skin as I slept soundly. When I was in the middle of my dream, something suddenly whispered in my two little ears. "Daughter, get up, get ready because you're going to school. I'll drop you off later." The heart is full of longing, because my view of the school is not so ravenous as if I am thirsty for the wisdom that I can get from this magical place. What is the secret of school, why does little children like me started to dream big here?

Planning. Getting up, opening my eyes, I lifted my body from bed, staggered, I forced myself to get up. I got up slowly, because at my young age I didn't delay the time because I still had a lot of time to plan for my future.

Preparation. There are different definitions of preparation, first "handa" at home comes from people working together to have delicious preparations. Second, "preparation" or preparation for the events we can face in life. My first preparation has guidance from my parents, this preparation has two definitions.

School. My hands were like ice in the cold because I was nervous to take the first step in the place full of mystery. This trepidation was replaced by sincere gratitude, because this place helped me to set foot in different places. From here comes the key to different worlds, it is truly mysterious.

August 29, 2023 is the first day of school for the children at Mandama Elementary School, finally everything was put into normal situation. It is the implementation of face-to-face classes.

I was disturbed by the dawn, from the cold breeze of the weather. I look back on my experiences as a student and now I am a full-fledged teacher who continues to be fascinated by three words that start with the letter P and S "Planning, Preparation, and School" to help the students have their own "Hiraya Manawari" (reach your dreams) I hope I can be an instrument for these children and make their dreams come true in life.

Uno, started good education from quality teachers who have been honed by time and are eager to teach again because of returning students. Getting up slowly every day with a happy smile on your face.

Dos, because of the trust that was formed among the school's constituents, the teachers put more effort into their teaching preparation skills. Various tricks are prepared to make children enjoy learning.

Tres, after a few months of schooling for the children inside the school. You will see that it produces good results. Because good changes are seen in every child at school.

When I left our little house to go to school, one, two, three, "Get up, get ready, I'll close the door because I'm going to school."
