

ESTABLISHING LEARNERS' SECOND HOME

by:

Ferdinand V. Fajardo

Teacher III, San Ramon Elementary School

For centuries, there has been an ongoing debate surrounding the concept of an ideal school. Many philosophers, educators, and parents have pondered over what makes a school truly ideal. In my opinion, an ideal school is one that provides a well-rounded education, fosters creativity and critical thinking skills, promotes inclusivity and diversity, and prioritizes the overall well-being of its students.

An ideal school should offer a well-rounded education that encompasses various subjects such as mathematics, science, literature, arts, and physical education. Students can gain a holistic understanding of the world and cultivate diverse skills by doing so.

An ideal school should encourage creativity and critical thinking skills. It should provide opportunities for students to explore their interests through project-based learning or extracurricular activities. By nurturing creativity and critical thinking abilities in students from an early age, they will be better equipped to face challenges in the future.

Moreover, an ideal school must promote inclusivity and diversity. It should create a safe environment where all students feel valued regardless of their race, gender identity or socioeconomic background. By embracing diversity within the student body as well as in the curriculum taught at the school, students will gain a broader perspective on life.

But most importantly, it prioritizes the overall well-being of its students. An ideal school should prioritize mental health by providing counseling services or mindfulness programs to help students cope with stressors they may face during their academic journey.

School is one that offers a well-rounded education while fostering creativity and critical thinking skills in its students. It also promotes inclusivity and diversity while prioritizing their overall well-being. Creating such schools requires collaboration between educators, parents and policymakers to ensure that every child has access to quality education in environments conducive to growth and development.
