

SCHOOL HEADS: THE MODERN AGENTS OF CHANGE

by:

ELMA P. DIZON

Public Schools District Supervisor, Limay District

Life is an unending process, human nature tends to continuously learn to survive. In education, there will and always be new trends to address different challenges. As a leader who guides and nurture educators in this generation. Innovative ideas is a must for them to be well equipped and produce the best learners to safeguard the future of this country.

According to Merriam Webster, innovation is defined as a new idea, device or method. In line with supervisory in education, as the person who is in charge of large areas of learning institutions. The following traits must manifest during their leadership. First, innovators should be highly confident. In addressing modern problems, modern solutions are needed thus in planning such proposing plans should be presented confidently to persuade people that it might be an effective strategy. Second, innovators must be creative, there must be no untouched stones in creating plans. As much as possible everything must be considered. Third, innovators are ready for new experiences, they must not be afraid to go out of their comfort zone, where most of the time learning happens. Fourth, innovators are well motivated of changes. They take this as an inspiration to think more out of the box and create innovations that can par with changes. Lastly, innovators are full of passion and resilient, these people should know when to stop and start. If ever gets tired of problems a little rest may do and continuously thrive for excellence. Generally accepts mistakes and listens very well on subordinates to come up with good plans.

Innovation in leadership is quite challenging, changes are constant and it demands so much. Continuous learning is generally the key to be successful and practice of ideas is a must to for innovation to continue.
