

THE IMPORTANCE OF BEING AN ETHICAL LEADER

by:

Jennilyn D. Alfonso

Teacher II, Kataasan Elementary School

Ethical is assigning management and leadership roles to individuals who will uphold and model proper, moral behavior in their interactions with coworkers. Ethical leadership is crucial for the organization, its clients, and its staff for several reasons. Having strong leadership qualities is essential to fostering an ethically sound workplace culture.

Being an ethical leader has many benefits. As a group, leaders have the power to encourage moral behavior in those around them. Others will follow your lead and behave ethically if you set an example and provide guidance. By providing them with a set of actions that they can adopt for the greater good, moral leaders can thereby positively influence many people. Behaving morally is crucial for credibility and reputation on a personal level for leaders. Becoming a leader takes time and effort. An A-league leader can be instantly removed from their position, and their company's reputation is severely harmed by unethical behavior. Furthermore, acting unethically frequently lowers a person's sense of self-worth, which results in less-than-ideal results and a lost chance to reach one's full potential.

Leaders have the power to give customers the impression that the company is a reliable and decent one. When customers perceive that an organization has leaders in place, they are more likely to feel loyal. Press coverage is more likely to occur in an organization with moral leaders. When partners and vendors witness an organization's leadership acting ethically, they will also feel that they can trust and collaborate with it.

In the short term, morale is capable of being improved, and passion for work and management can be fostered by moral leaders. It can boost morale and teamwork within the organization and make everyone feel more content to be at work.

In the long term, company controversies, ethical dilemmas, and ethical concerns can all be avoided by moral leadership. Additionally, it can assist firms in acquiring new clients and alliances, which ultimately results in increased revenue. Another essential component of a company's long-term success is having loyal workers.

In the end, both individuals and organizations can greatly benefit from ethical leadership in the short and long term.
