

## STRATEGIC LEARNING METHODS

*by:*

**Teodora T. Quezon**

*Teacher III, Bilolo Elementary School*

To involve different kinds of learners in the classroom, teachers can employ several effective learning methods:

1. **Differentiated Instruction:** Variety of instruction by using different teaching materials, methods, and activities to accommodate various learning styles. Provide choices for visual, auditory, and kinesthetic learners to engage with the concept.

2. **Cooperative Learning:** Encourage cooperative learning activities where learners work in small groups to complete given tasks or solve problems. This allows social learners to interact and learn from their peers.

3. **Hands-On and Experiential Learning:** Provide learners hands-on activities or reflections that allow kinesthetic learners to connect theories and knowledge learned in the classroom to real-life situations

4. **Use Visual Aids:** Incorporate visual aids to help visual learners stay engaged and focused on the task on hand. By incorporating images, videos and other forms of multimedia into your lessons can make learning more interactive and dynamic.

5. **Varied Instructional Materials:** Use resource materials to cater different learning preferences. These instructional materials allow learners to have practical experiences which help them to develop skills and concept.

6. **Formative Assessment:** Use formative assessment to monitor learning to provide immediate feedback and help adapt instruction to meet individual needs and be used to

improve teaching-learning. Formative assessment helps identify learners' strength and weaknesses and target areas that need emphasis.

7. Build Relationships: Build positive relationships with learners by tendering love, respect and care for their weaknesses and strengths. This establishes a supportive learning condition where all learners feel valued, respected and motivated to participate.
