

THE IMPACT OF TECHNOLOGY AMONG YOUNG GENERATION

by:

Liezl C. Bantugan

Teacher II, Bagac National High School

These days we are living in a world surrounded by modern technology. Technology has a great part in our lives nowadays especially to our generation today. Should we say that today's generations are fortunate to have this kind of technology or it harms our new generations? Currently, we observe in our young one's that technology influences both in positive and negative ways.

Almost 70% of the positive and negative effects of technology are faced by today's youth because they have increased access to modern technology in comparison with the rest of all (Singh, 2023). Technology makes our daily living easier. Most of the activities today use technology, in the home, in the market, in the business, and in different working places. Almost everything is manipulated by technology. Although technology brings these advantages, it has great disadvantages among young ones today. This technology makes generation nowadays lazy. They spend most of their time using different gadgets to the point that they ignore their responsibilities in home. Even their study habit is affected by this technology. Due to modern technology cyber bullying happens, pornography leads to teenage pregnancy, and connect easily to communicate to all people even to strangers harms our generation without proper guidance from their parents.

In addition, technology has an important advantage on new generation. Today's youth are good in using social media. They can explore and discover many things which help them knowledgeable and able to express themselves in their own ways. Technology

never ends as well as having new generation. It only depends to every generation on how they will use the modern technology.
