

A TEACHER MUST CREATE A CONDUCTIVE ATMOSPHERE

by:

Aileen S. Laluna

Teacher I, Tala Elementary School

Effective teaching and learning depend on a favorable classroom environment (Nufus, 2023.). An environment that supports student comfort, safety, and academic achievement is created in significant part by teachers (Fosu-Ayarkwah et al., 2022). Studies show that by controlling the surroundings and creating psycho-cultural practices, a good school environment enhances the learning quality (Syafaruddin et al., 2020). Furthermore, the efficient control of the instructors' surroundings is crucial for creating a welcoming and encouraging classroom (Mukhlis, 2024). Teachers' professionalism and behavior significantly affect student performance and the classroom environment (Soraya & Supadi, 2023).

To properly run their classrooms, teachers need a range of abilities, including responsiveness to student requirements, keeping a good atmosphere, and motivating active student involvement (Adiyono et al., 2022). Teachers' warmth and empathy contribute to a positive classroom environment, which enhances student participation and motivation (Kianinezhad, 2023). Moreover, teacher professionalism is essential in establishing an interesting and fun classroom, avoiding monotony, and inspiring student interest, using which monotony can be avoided. Teachers must constantly establish a laid-back and fun classroom if they are helping pupils shape their personalities (Samsudin, 2023).

Establishing a good learning environment across several disciplines and teaching approaches falls to teachers. For instance, a good classroom in language education depends on teachers' and students' suitable speech styles (Amiruddin & Jannah, 2022).

Furthermore, including moral principles taken from Hadiths will help establish a polite and encouraging classroom (Rahman, 2024). Teachers' emotional intelligence influences a joyful and peaceful learning environment, improving students' academic performance (Jaberi, 2024).

Teachers are crucial in establishing a suitable environment for good teaching and learning. Good classroom management, professional behavior, and friendly interactions with students can improve student involvement, motivation, and academic success. Teachers should constantly improve their abilities and create settings that support student growth and learning.
