

## BENEFITS OF CLASSROOM DESIGN

by:

**Yolanda Y. Santos**

*Master Teacher I, Mambog Elementary School  
Hermosa District*

People say that for the learners to be motivated and inspired to study the learning environment must be interesting and appealing. This connotes that the classroom design has a big influence in the learning process of every child.

Well-organized classroom design can set a conducive ambiance for learning. The schoolchildren are more inspired and interested to learn when the classroom is attractive.

Classroom designs contribute to the organization and task initiation of learners. The learners may be prompted to be organized in their studies and they will develop the sense of responsibility in doing various activities.

It is indeed imperative that the learning environment invites full of positivity to encourage learners to study. Beautiful classroom designs lead to positivity. These designs will stimulate learning.

Having a more conducive space and with the strategically arranged desks will be advantageous to learners. They will be more comfortable with their work and do their tasks more efficiently due to the said set up and design.

Having preference of a well-designed classroom will make children more comfortable with it and which will lead them to do better academically, thus make them become achievers in various subject areas.

The designs and the colors in them set the mood and will affect the way students learn. They become more active and participative whenever they are surrounded with color displays and artworks in the classroom.

The environment design in the classroom leads the students who study to good levels of natural light which helps them to perform better, and which assist them to easy reading, writing, and doing different educational activities.

Indeed, the classroom design has a lot of benefits, and it is contributory to the enjoyment and academic success of the learners.

During the school year, it is advisable that the teacher provides a better classroom design for the sake of schoolchildren.
