

## NEW OPPORTUNITIES FOR EDUCATION IN 2025

*by:*

**Josephine S. Hunter**

*Teacher I, Mandama Elementary School*

Educational opportunities speak about education for all whether one is a promising citizen of the country or not, situated in a disadvantaged position at a time or not. It is amazing to know that the Department of Education is doing every possible means to include everybody to experience education. The Alternative Learning System (ALS) caters not only the disadvantaged adults and persons with disability but also to those persons deprived of liberty who can enjoy the right to education. What else is there to offer? In due time, the implementation of the DepEd Matatag curriculum will rise in the system. It will set out new circumstances for the improvement of education with its initial priority to Kindergarten, grades one, four, and seven. This is supported in the next three years to completely adapt all the grade levels up to grade 12 by 2028.

Changes are challenges that teachers need to face in embracing the MATATAG Curriculum. The issues that will sprout out of these changes will be a compilation of educational opportunities. Resiliency is the answer.

Resiliency MA is to make an effort to check out what is there really before looking at the negative side. Observe and learn the updates it offers.

Resiliency TA is to take time to follow through to have a mastery of the recently developed curriculum.

Resiliency TA is to tack down the experiences that bridge the new from the old. It is not different from the previous one but rather an application of a boost towards a refined education in the Philippines.

Resiliency G is to go for it. It is there to help build up for the betterment of education in producing Filipinos who are competent, job-ready, and productive citizens.

Eventhough chances are all available to continue studies, on the other hand, Philstar has shared in a news article about the decreased figure of 27.03 to 26.23 million students enrolled in the SY 2023-2024. Where is the rest of this population? Hopefully the learners are there to grab every opportunity the DepEd Matatag Curriculum has to offer in the SY 2024-2025.
