

ELECTION: THE VOICE OF THE NATION

by:
THELMA M. DATU
Teacher III, Sapa Elementary School

By voting,
we add our voice to the chorus that forms opinions and the basis for actions.

It's a fast changing time we cast our votes stated by our law in a given time, from President, Vice President down to municipal and barangay level. Our votes can change the world through its best or through its worst. Think wise, think smart vote from our conscience.

We have the ability to change our sufferings through our votes. Our right to vote is priceless it doesn't have an equal value of money or favor. Don't settle for less we need to settle for the best.

Choosing the right officials is like shaping the future of the next generation. They will inherit the progress or adversity from our choices of leaders. The task of the government is to deliver a free, fair, peace and efficient election.

The choice of leaders is like mirroring or portraying our self, especially the young ones like them in the future. The best weapon is to have a critical thinking that comes from education. The reason why we educate our self or send our children to school is to cultivate their young minds to have a clear and sound judgement in the future.

Education is necessary it focuses on the right path. We cannot be deceived by any one, any price or any favor. We can also describe education as a powerful tool not to mislead by what is fake news and what is real news. We can process the correct information on who is eligible to vote.

The end part of education is to be the best asset of our country. All we need is to understand that while we are still in the role whatever it is, make the best out of it because it is the inheritance of the future.
