

SCHOOL AS A SECOND HOME FOR THE LEARNERS

by:
THELMA M. DATU
Teacher III, Sapa Elementary School

School is a building with has four walls and tomorrow inside. School is where the students come and obtain objective life.

We always say that school is our second home, where the future of the world arises. It plays a significant role in a child's life, similar to the role of their primary homes. Students learn great knowledge from school life. It is a study center house of organized learning.

Attending school is the best period in human life. School helps develop the character, virtues of learners, creativity and talents. It is the first place we build bonds of friendships, imbibe sportsmanship, social interaction and leadership skills.

School served as a creative platform that uplifts self-confidence, team work and other activities that balance our academic, moral and cultural heritage.

School offers home vibe environment, decorated rooms invite the feeling like home, printed curtains to look it cool, good lightning, good ventilation and other amenities like clean comfort room and faucet inside the classroom. The feeling of comfortability and safety of the learners are also considered.

Like at home, there are also rules to follow inside the school and inside the classroom. These rules help the learners to be responsible, creative and productive.

Experienced from the school is a long life treasure that we can pass it on to our future children. We considered everything around us in the school is like family

members. It is the best encounter in our life that once we learned the first thing, to write, read, dance, sing and others. Grab the opportunity of free education for our children to send them in the school.
