

PARENTAL INVOLVEMENT AND STUDENT ACHIEVEMENT: A POSITIVE CORRELATION

by:

Mark B. Macapinlac

Master Teacher I, Kanawan Integrated School, Morong District

Parental involvement is a crucial factor in a student's academic success. Research has consistently shown that when parents are involved in their child's education, students tend to perform better academically and have better social and emotional outcomes. In fact, studies have found that parental involvement is one of the most significant predictors of student achievement. There are several ways in which parental involvement can impact student achievement. For example, when parents are involved in their child's education, they are more likely to monitor their child's progress, attend parent-teacher conferences, and help with homework. This level of involvement helps to ensure that students are staying on top of their schoolwork and are receiving the support they need to succeed. Additionally, parental involvement can also have a positive impact on student motivation and engagement. When parents show an interest in their child's education, students are more likely to be motivated to learn and to take their education seriously. This, in turn, can lead to better academic performance and a greater sense of accomplishment.

The correlation between parental involvement and student achievement is well-documented. Studies have shown that students whose parents are involved in their education tend to have higher grades, better attendance, and higher graduation rates. Furthermore, parental involvement has also been linked to improved social and emotional outcomes, such as increased self-esteem and reduced behavioral problems.

In conclusion, parental involvement is a critical factor in student achievement. By being involved in their child's education, parents can help to ensure that their child

receives the support and guidance they need to succeed. Schools and educators can also play a role in promoting parental involvement by providing opportunities for parents to get involved and by keeping them informed about their child's progress.
